

“DESTINED TO LIVE THE GOOD LIFE OF GAZETTE”

Interested in Funding?

We are not fully funded this year. We need your help please.

Please consider your gift of \$35.00 per month to fully fund one child or \$70.00 per month will fund 2 children and \$105.00 per month will fund 3 children.

Your gift of life every month is tax deductible and essential to keep these children in their warm beds . For as little as \$1.17 per day you can invest in a child's future to keep them smiling growing and learning with expectancy of a great future.

AMAZING NEW LIFE RELEASED FOR OUR CHILDREN

“GOOD NEWS FROM FAR AWAY IS LIKE COLD WATER
TO THE THIRSTY.”

-Proverbs 25:25

Numerically in the bible 25 means this...**GRACE UPON GRACE** ...composed of 20 which means redemption and 5 which means GRACE multiply $5 \times 5 = 25$... Proverbs 25:25

We are proud to announce our first well will begin drilling within 2 weeks for our precious kids in Zambia. Gods grace was multiplied in this 5th month of **GRACE** and an explosion of new life is erupting prophetically in this season in this hour in this time, new wells of opportunity Praise God, new wells of kingdom advancement , new wells of favor, new wells of debt cancellation, new wells OF DIVINE ACCELERATION AND momentum. New wells of sudden manifestation of delayed prophetic words from years ago, new wells of healing, restitution and restoration. Expect larger than you ever have before because **A KINGDOM WELL SPRING OF GODS GLORY IS BRINGING A FLOOD OF PROMISES TO PASS IS HAPPENING NOW IN THIS MONTH OF MAY.**

Water Tower

As you can see from this picture, this is a Rain water serviced water tank. The property where our facility is in Kitwe has been dependent upon this kind of tank. Often a well will be used in

conjunction and water is pumped up to the tank. However the well on that property had gone dry and so our kids since we opened back in 2010 have had to be dependent upon rain water to fill the tank and or dirty water sources boiled even for drinking water. The water issue has been a very serious situation.

One of Steve & I's spiritual daughters Isabel and her husband Dylan heard from the Lord to finance this first well. In my prayer / war room I heard the Holy Spirit decree this well would be called Sandy's Well Of Life. Sandy is Izzy's birth mothers name who is in heaven and the name of our grandchild Izzy's, little girl due to be born this October.

Here`s a few stats of the necessity of clean water...

The need for clean water is critical and essential. Here are some stats from Africa:

- Waterborne diseases are the second leading cause of death for children under the age of 5.**
- Nearly 700 million people lack access to safe drinking water.**
- 60% of infant deaths worldwide are related to waterborne illnesses.**

Each new well drilled and established on average, provide 1000 people in the villages and surrounding areas with disease-free drinking water. While the average cost of a new or restored well remains \$4800 through most ministry organizations, our cost to bring a crew in is much cheaper, \$3500 and clean water can be provided for a child or an adult in most cases for an entire lifetime !

Clean water is a lifesaving blessing for today and a promise for a better, brighter future!

Drilling wells in Africa is costly, but crucial to wiping out leading cause of preventable blindness and assuring wiping out a multitude of diseases due to unclean water and bad sanitation with bathing and toiletries.

"Children watch drilling in Sinazongwe, Zambia"

- Trachoma is a painful, potentially blinding eye disease that was once endemic around the globe, but as clean water and sanitation systems became widespread, it disappeared from the industrialized world.

Today it remains a problem in 55 nations where living conditions are poor and safe water and sanitation are scarce. In Kenya and Zambia, where Some organizations are drilling wells as part of its strategy to conquer trachoma, up to 30 percent of children are infected. With new wells drilled we drastically reduce the risk of a multiplicity of serious disease leading to premature death.

"Past efforts to deal with trachoma focused on treatment alone, only to find that without clean water and good sanitation the eye disease and other serious diseases would return and or remain. "Clean water and sanitation cost more up front, but long term, they are the most economical option as they permanently eradicate almost every disease."

The cost of drilling wells in Africa varies widely depending on depth of the water table, geological formations and available local resources. In Sinazongwe, Zambia, for example, the average cost of a well is between \$3,500.00 to \$5,000.00 These relatively shallow wells average 65 meters in depth, so simple hand pumps are adequate to operate them. For people in any of these drought-prone rural areas, safe accessible water is the difference between barely surviving and thriving. It's the key to good health, educational opportunities and a long life.

Water Situation

In these next pictures you will see the current water situation widely used. In August when we visited the kids, I noticed the dirty water in the large round buckets

(Shown in the picture to the right) that they were bathing the younger children in.

Also right behind our facility a hole (similar to the picture above) this dirt muddy hole is where they draw water from for the older kids to take sponge baths.

May 2016

Extraordinary People Awards

Again this year Steve & I have been ask to return to the second annual **EXTRAORDINARY PEOPLE AWARDS** which will be hosted in Florida in Sept. We are the poster child so to speak on the home page of this event our video clip from last year is being displayed. Steve and I will also be recipients of an award again I'm told which truly humbles us with gratitude to papa for his favor. I was also ask to sit on a panel of judges for best 10 dressed at the event as you can see here .

But now look at what God has done!

Within two weeks our kids will be shouting and praising God. They will be drinking and bathing in pure, clean, fresh water, for most of them this will be the very **first** time in their lives. This well is a huge blessing that will enable them to establish their own food supply because now they can plant small gardens and have adequate water to irrigate.

We want to thank each of our monthly sponsors for your faithful prayers and support that keeps our doors open and these children safe, warm, fed, and educated. We cannot possibly do what we are doing without each of you.

May 2016

We need those of you willing to say, “Yes, Deborah and Steve, we would like to commit to being daily intercessors for you and the children.”

So PLEASE, PLEASE WE NEED MORE DAILY INTERCESSORS TO STEP FORWARD so as not to leave any space for the enemy to attack because of the favor being released.

Please email me if you feel you would like to join our prayer circle .

Thank you for your prayerful consideration of joining our team and partnering with us to make sure that we are fully funded once again . Your tax deductible donation can be made here
